

Macel Plin d.o.o., as an authorized agent and service provider for reputable manufacturer of natural gas reduction equipment *TARTARINI O.M.T.*, was founded in 2002.

In addition to natural gas reduction equipment manufactured by Tartarini O.M.T, we are certified to provide complete service of reduction equipment ACTARIS, plug valves Galli & Cassina, ball valves *PERAR* and propose complete program of regular maintenance according to the current normative and manufacturer's recommendation including :

- semiannual and annual functional testing
- regular servicing using only original manufacturer's spare parts

Our intention was to provide complete service, maintenance and sales program of natural gas reduction equipment since it is most commonly installed in high and medium pressure ranges in Croatia.

With our knowledge and continuing education, service equipment and original spare parts, we provide quick and reliable service to our clients, making sure that your natural gas needs will not be interrupted due to equipment malfunction.

Our scope of service / supply:

1. Maintenance of natural gas reduction equipment

Our core business presents complete care and maintenance program for natural-gas reduction equipment including:

- ❖ semi-annual functional test and exchange of natural gas filters
- ❖ regular annual maintenance and service including filter exchange and calibration of safety relief valves as per Croatian Normative for natural gas equipment.

For our service center, we are equipped with two mobile repair workshops for service in the field for all kind of reduction equipment up to 16" (DN 400), using specialized tools, spare parts and replacement filter cartridges.

2. Procurement and delivery of reduction equipment, valves and piping for natural gas

Long term presence of Tartarini reduction equipment in Croatian market and current natural gas pipeline expansion in this region presented an opportunity to provide complete service to our clients for natural gas distribution, and our business has currently expanded including all equipment needed for natural gas distribution like plug and ball valves, filters, piping and connections. Segment of our sales of supporting equipment for natural gas distribution currently takes significant part of our business.

We currently offer equipment and represent the following manufacturers:

- Perar S.p.A- ball valves

- Galli & Cassina- plug valves
- Forain – filter separators and coalescers
- Tecno Filtri- filter cartridges for natural gas filtration
- ZUNT Italiana- monolithic insulating joints

3. Reconstruction of Natural Gas reduction/metering stations and delivery of pre-assembled stations on the skid

In addition to service and maintenance of existing natural gas reduction equipment, if there is a need for equipment replacement due to the old age, capacity or technology requirements, we offer complete solution that can match your current natural gas needs and budget, ensuring that your production or distribution of natural gas satisfies your requirements.

Our support includes proposal, design and delivery of reduction equipment or complete stations already pre-assembled on the skid, easily connecting to your existing pipelines. Our service personell is fully equipped and has certification for TIG and REL welding to install delivered equipment on your site.

We have already supplied completed stations to local distributors and local businesses lile PIK Rijeka, Energo-Rijeka (MRS Mlaka and MRS Kostrena), underground reductions stations to Komunalac Koprivnica and others.

4. Maintenance and delivery of natural gas filling stations (CNG)

Our lattest program in addition to maintenance of compressors for natural gas used in CNG filling stations.

we are proud to announce our partnership with ASPRO-Italy and currently have two major projects in progress for natural gas filling stations- equipment delivery, installation and start-up for public companies which will fill the busses for public transportation in Zagreb and Rijeka.

We hope that after this initial programs, other public or private investors will recognize the feasibility and benefits of natural gas as the fuel alternative and start seriously considering it's development in this region.

5. Other services

We offer additional services:

- Annual calibration of safety relief valves
- Maintenance of plug and ball valves manufactured by Galli & Cassina and Perar
- Pilot connections to regulators and shut-off devices, start-up procedures and set up of reduction equipment according to the manufacturer's specifications
- Service and maintenance of reduction equipment of other manufacturers like Actaris/Rombach, Specijalna Oprema, Ina and others

6. Our personell

This company could not achieve its today's standing in the market without its personnel and service technicians which are continuously being educated at the factories and R&D offices of our main suppliers, showing initiative in finding new solutions and technologies to find better and complete solutions for your needs in natural gas applications.

Our current staff is composed of two engineers, three service technicians, procurement specialist, Accounting department and Operating manager.

7. Major completed contracts

PLINACRO LTD State Natural Gas Transportation System	Procurement of equipment for natural gas regulation, transportation and filtration for National Pipeline: Pula –Karlovac Slobodnica- D. Miholjac Gas pipeline Lika- Dalmatia
	Procurement and delivery of piping and piping connection material
	Annual calibration and inspection of safety relief valves
	Regular maintenance of plug & ball valves
MONTER SM	Sale of piping material
	Joint venture projects in natural gas pipeline constructions
Local natural gas Distributors in region	
Zagreb City Gas company (GPZ)	Procurement of equipment for natural gas regulation, transportation and filtration
	Annual calibration and inspection of safety relief valves
Energo d.o.o. Rijeka	Procurement of equipment for natural gas regulation, transportation and filtration
	Annual calibration and inspection of safety relief valves
Plinara Pula	Procurement of equipment for natural gas regulation, transportation and filtration
	Annual calibration and inspection of safety relief valves
EVN Croatia	Procurement of equipment for natural gas regulation, transportation and filtration
Industry	
KRAŠ – Zagreb	Annual calibration and inspection of safety relief valves Procurement of equipment for natural gas regulation, transportation and filtration
Pliva	
HEP	
Energometan	Annual maintenance of natural gas reduction equipment

Due to the specialization of our services and quality performance, Macel Plin d.o.o. has obtained and secured the contracts with significant number of local natural gas distributors and direct contract with equipment manufacturers, ensuring quality and reliability of equipment installed.

Sincerely,

For

Macel plin d.o.o.
